M. Morris Writes of Scenes in and About Stockton-A Manufacturing Point of Importance. STOCKTON, CAL., March 1.-In 1849, the year after gold was discovered at Sutter's Mill, Stockton was, or the

a distributing point from which sup-plies were hauled to the mines. It was named in honor of Commodo Stockton, of the old navy. It is situated at the head of the Weber Slough, now called Stockton Channel, which was dredged out and widened and which connects with the SanJonquin river about 2 miles west of

place where it is now, a town of tents,

IN SUNNY CALIFORNIA.

The city of Stockton proper is exactly 2 miles square and contains about 20,000 people, the suburts about 5,000 more. The boundaries of the city on three sides are streets or boulevard graded up, mading nice driveways, called East, North and South streets. The west boundry not being so graded on account of the unvigation of the waterway. The streets all run at right angels and the blocks are all 300 feet square, about 2 acres in each block and strange to say, there is not an alley in the city, not even in the bus ness portion. There are 2 transporta tion companies with wharves and warehouses, whose steamers make regular trips to San Francisco and intermediate points, carrying passen gers and freight. Besides the steam ers there are numerous barges shooners, steam tugs, scows, etc, con stantly running between this point and the different bays on the coast. There are large manufacturing in

terests here, consisting of flour mills iron works, broweries, wineries, car neries and tanneries. Also woolen mills, planing mills and a briquette manufactory and others now under the trees. The principal streets here process of construction, among which are paved with granite and some of are an ice plant, a glass factory and them have a coating of asphalt put an iron foundry.

The output of one of the large flour them smooth and easy. There we mills for the month of January, last, spent on the streets of this city last was 24,000 tons of floor; the capacity of year the sum of \$60,000. They use a the same mill being 3,000 barrels per street sweeping machine, drawn by day. The warehouse capacity of the 3 mills here is 150,000 tons of wheat when but few people are on the street. The tannery here covers at least 3 Nearly all nationalities are represent acres of ground, the finished product ed in the population here—Americans, of which goes to China, Japan and Eu-Germans, Italians, Irish, Mexicans,

Stockton, or rather the ground it stands on, is as level as a pan-cake and during its existence has been three times overflowed with water. The other day I met a man on the street, it was raining hard and I remarked that I had been told that the city had been under water two or three times to some extent at least. But there are many things here I like and some things I don't like wet I have yet to that I had been told that the city had been under water two or three times and he responded: "Yes, 'tis a pity the d—d town didn't wash away. It is no good nohow." So you see all the kickers don't live in Missouri, He may have come from Missouri, He may
